Insights & Recommendations

■ CRITICAL — MFA: 25.0% adoption

1 of 4 users have MFA enabled. Every account without MFA is a credential-theft risk. Enforce 2FA immediately.

■ CRITICAL — P99 Response: 0ms

Max response time: 0ms. Investigate slowest endpoints. Add Redis caching for frequent ORM queries. Target P99 < 2,000ms.

■ HIGH — Off-Hours API Activity

Significant API traffic detected outside office hours. Verify whether automated/cron tasks or unauthorised sessions.

■ HIGH — Equipment: 0 items under repair

KES 0 in assets unavailable for use. Establish 48h maintenance SLA and procure spare equipment.

✓ POSITIVE — Emergency Response: 10/10 resolved

All emergency alerts were successfully resolved. Document the response playbook.

✓ POSITIVE — Task Review Speed

Both submitted tasks reviewed within minutes. Outstanding supervisor performance.
