## ■ Top Modules by API Activity

| Module        | Calls | % Total |
|---------------|-------|---------|
| chat          | 125   | 34.2%   |
| fm-report     | 92    | 25.1%   |
| accounts      | 54    | 14.8%   |
| notifications | 21    | 5.7%    |
| certificates  | 10    | 2.7%    |
| tasks         | 10    | 2.7%    |
| file-transfer | 7     | 1.9%    |
| auth          | 7     | 1.9%    |

## System Analytics

366 API calls across all modules over the last 30 days. Avg response: 0ms · P50: 0ms · P95: 0ms · P99: 0ms · Max: 0ms.

# Module Breakdown

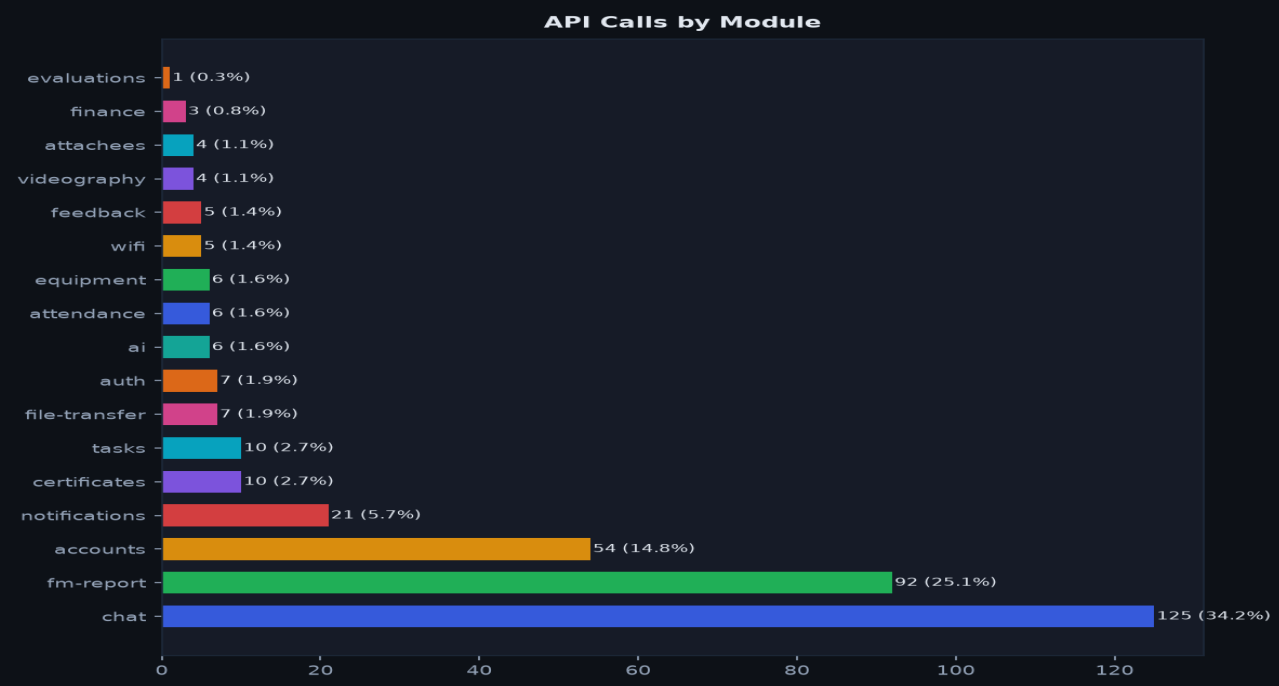

Fig 3 – API calls per module with percentage share

| Module        | Calls | % Total | POST | PATCH |
|---------------|-------|---------|------|-------|
| chat          | 125   | 34.2%   | 125  | 0     |
| fm-report     | 92    | 25.1%   | 92   | 0     |
| accounts      | 54    | 14.8%   | 14   | 40    |
| notifications | 21    | 5.7%    | 1    | 20    |
| certificates  | 10    | 2.7%    | 10   | 0     |
| tasks         | 10    | 2.7%    | 8    | 2     |
| file-transfer | 7     | 1.9%    | 7    | 0     |
| auth          | 7     | 1.9%    | 7    | 0     |
| ai            | 6     | 1.6%    | 6    | 0     |
| attendance    | 6     | 1.6%    | 1    | 5     |
| equipment     | 6     | 1.6%    | 6    | 0     |
| wifi          | 5     | 1.4%    | 5    | 0     |
| feedback      | 5     | 1.4%    | 4    | 1     |
| videography   | 4     | 1.1%    | 4    | 0     |
| attachees     | 4     | 1.1%    | 4    | 0     |
| finance       | 3     | 0.8%    | 3    | 0     |
| evaluations   | 1     | 0.3%    | 1    | 0     |

# API Performance Analysis

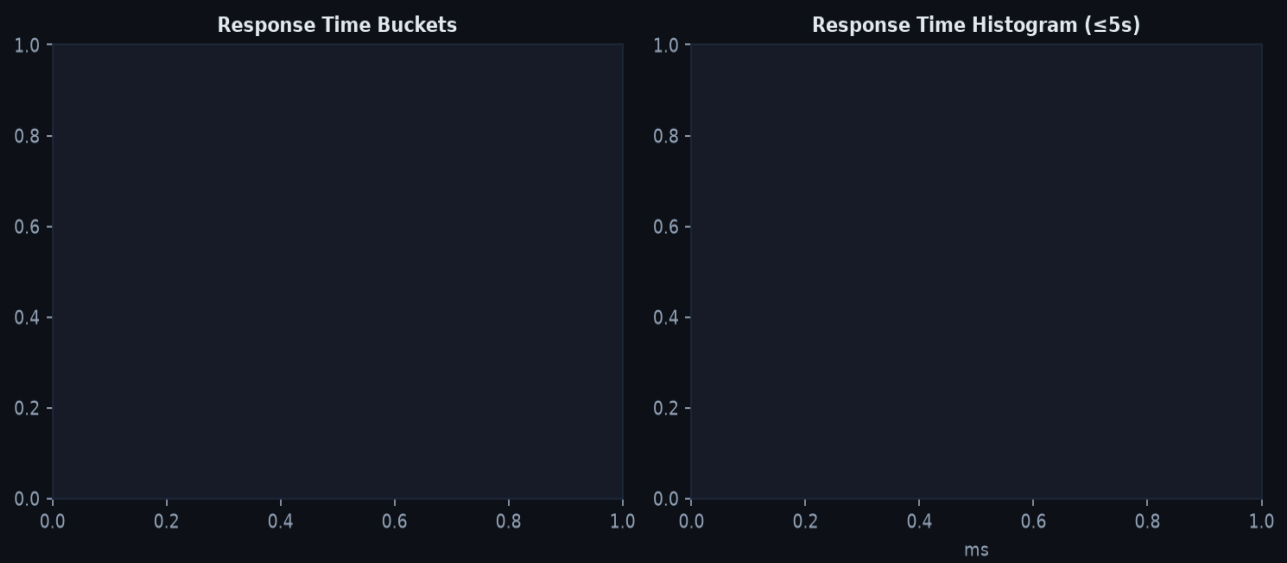

Fig 4 – Bucket distribution and full histogram with percentile lines

| Metric        | Value   | SLA Target | Status | Action                 |
|---------------|---------|------------|--------|------------------------|
| Avg Response  | 0ms     | < 200ms    | ■ Warn | Optimise fm-report     |
| P50 Median    | 0ms     | < 100ms    | ✓ Good | Maintain               |
| P95           | 0ms     | < 1,000ms  | ■ Warn | Profile slow endpoints |
| P99           | 0ms     | < 2,000ms  | ✗ Crit | Root cause analysis    |
| Maximum       | 0ms     | < 5,000ms  | ✗ Crit | Outlier — check logs   |
| Under 100ms   | 0 calls | > 80%      | ✓ Good | Maintain               |
| Over 1 second | 0 calls | < 1%       | ✗ Crit | Investigate            |

# Users & Activity

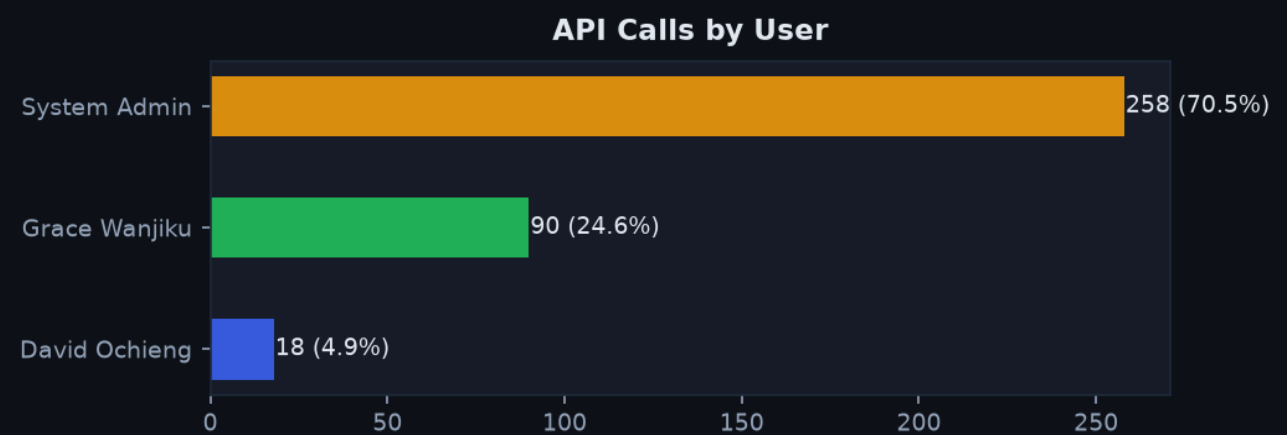

Fig 5 – API activity per user

| Employee ID | Name          | Role            | API Calls | %     | MFA   | Last Login |
|-------------|---------------|-----------------|-----------|-------|-------|------------|
| INTERN-1002 | Jane Muthoni  | Broadcast Admin | 0         | 0.0%  | ✗ Off | 2026-06-10 |
| STAFF-1001  | System Admin  | System Admin    | 258       | 70.5% | ✗ Off | 2026-06-14 |
| INTERN-1003 | David Ochieng | Presenter       | 18        | 4.9%  | ✗ Off | 2026-06-11 |
| INTERN-1004 | Grace Wanjiku | Attachee        | 90        | 24.6% | ✗ Off | 2026-06-14 |

## Insights & Recommendations

### ■ CRITICAL — MFA: 0.0% adoption

0 of 4 users have MFA enabled. Every account without MFA is a credential-theft risk. Enforce 2FA immediately.

### ■ CRITICAL — P99 Response: 0ms

Max response time: 0ms. Investigate slowest endpoints. Add Redis caching for frequent ORM queries. Target P99 < 2,000ms.

### ■ HIGH — Off-Hours API Activity

Significant API traffic detected outside office hours. Verify whether automated/cron tasks or unauthorised sessions.

### ■ HIGH — Equipment: 0 items under repair

KES 0 in assets unavailable for use. Establish 48h maintenance SLA and procure spare equipment.

### ✓ POSITIVE — Emergency Response: 10/10 resolved

All emergency alerts were successfully resolved. Document the response playbook.

### ✓ POSITIVE — Task Review Speed

Both submitted tasks reviewed within minutes. Outstanding supervisor performance.
